2008 Current Year Estimate of Population

Map 3.1: 2008 Total Population

Map Notes

- Measures persons per census block group
- Dark colors are census block groups with higher population; light colors lower population
- Light gray lines are census block group boundaries
- Purple lines are NPAs
- The highest 2008 population are in census block groups in the following NPAs: south part of Lakewood, portions of West Murphy, most of East Murphy, and small areas in Washington, De Anza, and Ortega
- Universe: current year estimate of population

3.0 Demographic Profile

2013 Population Forecast

Map 3.2: 2013 Total Population

Map Notes

- Measures persons per census block group
- Dark colors are census block groups with higher population; light colors lower population
- Light gray lines are census block group boundaries
- Purple lines are NPAs
- The 2013 forecast population distribution has the same pattern as in 2008
- The highest 2013 population is forecast in census block groups in the following NPAs: south part of Lakewood, portions of West Murphy, most of East Murphy, and small areas in Washington, De Anza, and Ortega
- Universe: five year population forecast

3.0 Demographic Profile

2008 Population Density

Map 3.3: 2008 Population Density

Map Notes

- Measures persons per square mile
- Indicates density of population
- Dark colors are census block groups with higher density of population; light colors lower density
- Light gray lines are census block group boundaries
- Purple lines are NPAs
- The highest 2008 population density is in census block groups in the following NPAs: eastern Washington, portions of West Murphy, Ponderosa, and the southern part of Lakewood
- Universe: current year estimate of population

3.0 Demographic Profile

2013 Forecast Population Density

Map 3.4: 2013 Population Density

Map Notes

- Measures persons per square mile
- Indicates density of population
- Dark colors are census block groups with higher density of population; light colors lower density
- Light gray lines are census block group boundaries
- Purple lines are NPAs
- The 2013 forecast population distribution has the same pattern as in 2008
- The highest 2013 population density is in census block groups in the following NPAs: eastern Washington, portions of West Murphy, Ponderosa, and the southern part of Lakewood
- Universe: five year population forecast

3.0 Demographic Profile

2008 – 2013 Population Growth

Map 3.5: 2008 – 2013 Compound Annual Growth Rate

Map Notes

- Measures the compound annual rate of population change between 2008 and 2013 by census block group
- Dark colors are census block groups with higher population growth; lighter colors lower population growth
- Purple lines are NPAs
- The highest growth is in certain census block groups in the following NPAs: Washington, West Murphy, East Murphy, Lakewood, Ponderosa, De Anza, and Raynor
- Universe: current year estimate of population and five year population forecast
