

# The City of Sunnyvale invites you to participate in a public meeting on the Mary Avenue Street Space Allocation Study

## About the Study

The Mary Avenue Street Space Allocation Study will look at different ways to accommodate motor vehicles, bicycles, pedestrians and transit along Mary Avenue between Fremont and Maude Avenues. The study will apply the City's Policy for the Allocation of Street Space, which promotes the continued planning, design and construction of a comprehensive citywide bikeway network. Application of this policy will be integral to the evaluation of street configuration design alternatives proposed under this Study.

The goal of the study is to develop a street design that will promote safer and more convenient access for all road users, including bicyclists, in accordance with the City of Sunnyvale Bicycle Plan and Policy for the Allocation of Street Space. Such a design may include the provision of bicycle lanes and removal of parking along certain portions of the Study corridor.

## Next Steps

The City and consultant team will review all community member comments concerning the preliminary alternatives and evaluation criteria. After discussion with City staff and the City's Bicycle and Pedestrian Advisory Commission (BPAC), the consultant team will refine the preliminary alternatives based on community comments, City staff input, and the final evaluation criteria. The refined alternatives will be presented to community members at a second public meeting in which further public input will be welcomed.

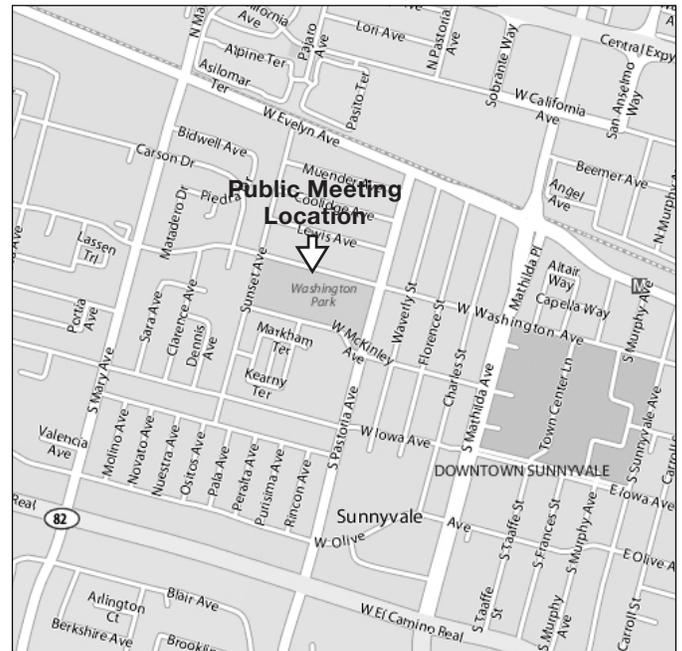

### Attend a Public Meeting

**DATE:** October 13, 2010  
**TIME:** 7:00 – 9:00PM  
**LOCATION:** Washington Park  
840 W. Washington Ave.  
Sunnyvale, CA, 94088

## About the Public Meeting

The City will host this initial public meeting to present preliminary design alternatives for reallocating road space on Mary Avenue developed by the City's transportation consultant, as well as proposed evaluation criteria to be applied to these alternatives. This meeting will provide an opportunity for interested community members to review the preliminary alternatives, share comments and suggestions, and provide feedback to the project team.

### Meeting Location Map

### For More Information

To learn more about the project and view the preliminary design alternatives for the Mary Avenue corridor, please visit the project web page (<http://sunnyvale.ca.gov/Departments/PublicWorks/PublicWorksHotTopics/MaryAvenueStreetSpaceAllocationStudy.aspx>), or contact Jack Witthaus, Transportation and Traffic Manager, Public Works, P.O. Box 3707, Sunnyvale, CA 94088-3707, (408) 730-7330.
