

Environmental Fairs

Are you a Sunnyvale business that wants to provide on-site environmental protection education to your employees?

Do you have an annual science or environmental fair at your school?

Outreach can set up a booth at your event featuring a variety of games and information about water pollution prevention, water conservation, and watershed stewardship. We can also help you contact other organizations in Santa Clara County who provide information on a wide range of environmental topics such as energy, solid waste, air, recycling, transportation, open space preservation and restoration.
