SUBJECT: **2010-7843**: Appeal of a Decision by the Director of Community Development denying a Tree Removal Permit for eight of nine trees. The property is located at **575 E. Remington Drive** in an R-4/PD (High-Density Residential/Planned Development) Zoning District (APNs: 211-20-041, 211-20-060, 211-20-062)

**REPORT IN BRIEF:**

**Existing Site Conditions**

**Surrounding Land Uses**

- **North**: Commercial along El Camino Real
- **South**: Townhomes and Orchard Heritage Park
- **East**: Apartments
- **West**: Townhomes and Apartments

**Issues**

**Environmental Status**

A Class 4 Categorical Exemption relieves this project from California Environmental Quality Act provisions and City Guidelines.

**Staff Recommendation**

Deny the Appeal and Deny the Tree Removal Permit for eight of the nine trees

BACKGROUND:

Two Tree Removal Permit (2010-7843 & 2010-7844) applications were filed by the property owner on November 30, 2010 to remove approximately 21 trees of varying species at Remington Grove Apartments.

<td>11</td>
<td>1</td>
</tr>
</tbody>
</table>

The subject Tree Removal Application 2010-7843 consisted of nine trees located on the western portion of the site (Remington Grove Apartments). On December 6, 2010, the City Arborist inspected the trees and recommended denial of eight Canary Island Pine trees. (Attachment C – Site Map). Planning Division staff concurred with the City Arborist’s recommendation and notified the applicant of the decision on December 14, 2010 (Attachment D – Permit Letter). A table of findings for each tree provided by the City Arborist is also included in Attachment D. The applicant appealed the Tree Removal Permit (Attachment E – Appeal Letter) on December 21, 2010.

For the subject application (2010-7843), as shown on the Site Map in Attachment C, trees #1 and #3-9 were denied for removal while tree #2 was approved. Each of these trees associated with this application are Canary Island Pines.

Previous Actions on the Site

The following table summarizes previous planning applications related to the project site.
<table>

</table>

Two of the eight denied tree removals of the subject application were also denied as part of the 2004-0377 permit request. The 2001-0633 Tree Removal Permit also appears to have included each of the denied trees that are associated with the current permit applications.

**DISCUSSION:**

**Applicant’s Appeal**

The applicant has submitted a letter (Attachment E) stating that the removal of the nine trees (2010-7843 & 7844) are justified due to “posing a significant hazard to the existing property and the public”. The applicant provided a recommendation from a certified arborist, Carlos Corona, which noted that it is “highly likely that the subject tree will fail in the near future (or it) will create significant structure damage.” The applicant has also noted that pruning and thinning out the trees has been helpful but is not a good, long term solution because the trees are too close to the building. He further states that previous pruning has occurred and the same hazards remain, and it would be only a temporary solution of protecting property and people. The applicant has provided photos of the trees as included in Attachment E.

**Staff Discussion**

Planning staff and the City Arborist have each visited the site. The City Arborist notes that many of the Canary Island Pines are vigorous and have been well maintained. These trees are considered semi-mature and have 30-40 years remaining life expectancy. The inspection also noted that each of the Monterey Pines and three other Canary pines were diseased, damaged or future growth threatened the structure or gas line. Approval was granted for 12 of the requested 21 trees. The nine trees recommended for retention could be routinely pruned. The use of heavy end weights and co-dominant laterals is recommended. Each of the trees recommended for retention are considered to be in “Good” condition by the City Arborist.
The City Arborist has met with the applicant on-site and recommended additional measures that could allow for reconsideration of certain trees. It was noted that an excavation of those trees adjacent to structures could show whether roots would cause a significant chance of a problem where root cutting may not be an option. This had been demonstrated for tree #11, which had been approved for removal. Although it was felt that certain trees had a natural lean, a recommendation was made for a cabling system on specific trees which would further provide confidence in the stability of the trees.

**Environmental Review**

A Class 4 Categorical Exemption relieves this project from California Environmental Quality Act provisions and City Guidelines. Class 4 Categorical Exemptions includes minor alteration of land.

**FISCAL IMPACT**

No fiscal impacts other than normal fees and taxes are expected.

Staff has not received any written feedback regarding the proposal.

**CONCLUSION**

**Discussion:** Staff is recommending denial of the appeal because the Findings for tree removal (Attachment A) were not made.

**Findings and General Plan Goals:** Staff was not able to make the required Findings for the Tree Removal Permit. Recommended Findings and General Plan Goals are located in Attachment A.

**Conditions of Approval:** Recommended Conditions of Approval are located in Attachment B.
ALTERNATIVES

1. Deny the appeal and uphold the decision of the Director of Community Development to deny a portion of the Tree Removal Permit.

2. Grant the appeal and approve the Tree Removal Permit subject to the conditions in Attachment B.

3. Grant the appeal and approve the Tree Removal Permit with modified conditions.

RECOMMENDATION

Alternative 1. Deny the appeal and uphold the decision of the Director of Community Development.

Table of Findings
E. Letter from the Applicant including photos of subject trees (also includes private certified arborist report)
RECOMMENDED FINDINGS

Tree Removal Permit

In order to grant a Tree Removal Permit, one or more of the following findings must be met. Based on the additional information, staff was able to make one of the three required findings.

1. The tree is diseased or badly damaged. *(Finding Not Met)*

   *The subject trees that were previously denied are not diseased or damaged. They have been found to be in good health and condition by the City Arborist.*

2. The tree represents a potential hazard to people, structures or other trees. *(Finding Not Met)*

   *Staff found that those trees recommended for retention do not pose a potential threat to people, structures, or other trees. The City Arborist has noted that routine maintenance with pruning and recommended measures such as heavy end weights could ensure a longer lifespan. In other cases, additional excavation would also need to be demonstrated to indicate that those trees that close to structures are a potential hazard or could not otherwise be pruned.*

3. The tree is in basically sound condition, but restricts the owner’s ability to enjoy the reasonable use or economic potential of the property, or unreasonably restricts an adjoining property’s use or economic potential of the adjoining property. In the event this is the sole basis for the application, the following criteria shall be used to evaluate the application under this subsection *(Finding Not Met)*:

   a. The necessity of the requested removal to allow construction of improvements such as additions to existing buildings or incidental site amenities or to otherwise allow economic or reasonable enjoyment of property;

   b. The topography of the land and the effect of the requested action on water retention and diversion or increased flow of surface water;

   c. The approximate age of the tree relative to its average life span;

   d. The potential effect of removal on soil erosion and stability where the tree is located;

   e. Current and future visual screening potential

   f. A property has sufficient landscaping or is over landscaped

   g. Allow removal of overgrown, but healthy, trees.

   h. Any other information the Director of Community Development finds pertinent to the application.
The subject trees are not restricting reasonable use or economic potential of the property or adjoining property. City staff has visited the site and has determined that those trees approved for denial are is in good health and have a remaining life expectancy of at least 30 to 40 years with appropriate maintenance and therefore merit preservation.
Planning Application 2010-7843, 575 E. Remington Drive
Tree Removal Permit to allow the removal for nine trees
located throughout Remington Grove Apartments.

In addition to complying with all applicable City, County, State and Federal
Statutes, Codes, Ordinances, Resolutions and Regulations, Permittee expressly
accepts and agrees to comply with the following conditions of approval of this
Permit:

Unless otherwise noted, all conditions shall be subject to the review of approval
of the Director of Community Development.

1. Nine replacement trees, a minimum of 15-gallon size, shall be planted
anywhere on the property within 90 days of removal of the subject tree. If
a replacement tree is not planted, an in-lieu fee of $230.00 shall be paid to
the City within 90 days of removal of the subject tree to allow a tree to be
planted on City property.
3-9 locations of trees recommended to be preserved

Subject: Tree Removal Permit – 575 E. Remington Drive
File No.: 2010-7843

Dear Steve Pavlina:

The Department of Community Development has reviewed your application for a Tree Removal Permit for **nine (9) Canary Island Pine trees** located at the above referenced address.

**Approval** is granted for removal of **one (1) Canary Island Pine tree**, specified as #2, in the application. The Department of Community Development has **denied** your request for removal of the remaining **eight (8) Canary Island Pine trees**. In order to grant a tree removal permit, at least one of the following findings is necessary: (1) the tree is not healthy, (2) it represents a potential hazard, or (3) it unreasonably restricts the use of your property or your neighbor’s use of their property. Based on an examination of the subject tree, none of these findings can be made. Please refer to the ISA Pruning Guidelines at [http://www.treesaregood.com](http://www.treesaregood.com) for information on safe pruning techniques to avoid damaging the tree. We strongly recommend consulting a Certified Arborist for pruning assistance.

The Sunnyvale Tree Preservation Ordinance was adopted to protect the diversity of trees in Sunnyvale. Trees are a valuable asset to the community in terms of aesthetics, protection of habitat, and enhancement of economic value of property and may be removed only under the circumstances noted above. The trees are not diseased or damaged and have approximately 30-40 years of remaining life expectancy. The subject trees also do not appear to be posing a hazard to the site and surrounding structures. The trees have a natural lean and no apparent root damage have been caused.

You may appeal this decision to the Planning Commission by filing a written appeal within fifteen calendar days of the date of this notice. There is a $142.00 filing fee for the appeal.

According to the Sunnyvale Municipal Code, Section 19.94.080, any tree removed is required to be replaced. To replace the trees approved for removal, the City requires that **one (1) 15-gallon tree for every removal (1 approved)** of any suitable **medium or large-sized species** be planted anywhere on the site where it can grow to maturity unimpaired. You may refer to the City’s website [Trees.inSunnyvale.com](http://Trees.inSunnyvale.com) for information
regarding appropriate trees for the site. Please **complete and mail the enclosed Tree Replacement Postcard** to let us know when the replacement tree has been planted.

If you do not wish to plant the replacement tree, or do not have room for the replacement tree, a $247.00 in-lieu fee for each replacement tree not planted shall be paid to the City of Sunnyvale. Funds are used to plant trees on public property within the City. Checks shall be made payable to the City of Sunnyvale (please include your driver’s license number on the check), and are due **within 90 days of the date of removal** of the subject tree. Please include "Attn: Planning Division" on the envelope.

This Tree Removal Permit is valid for a year from the date of issuance. **The permit must be displayed in a location visible from the public right-of-way during tree removal.** If you need assistance with replacement tree selection, you may consult with the City Arborist, Steve Sukke, at (408) 730-7505. If you have any questions regarding this permit, please contact me at (408) 730-7431. Thank you for your cooperation.

Sincerely,

456 W. Olive Ave.
Sunnyvale, CA 94088-3707

Subject: Tree Removal Permits: City File Numbers 2010-7843 and 2010-7844

Dear Mr. Kuchenig:

In response to the letters (copies attached) dated December 14, 2010, from the City of Sunnyvale pertaining to two Tree Removal Permits (City File Numbers 2010-7843 and 2010-7844); this letter was filed with the City of Sunnyvale on December 21, 2010, to request its Planning Commission to appeal the decision by the Planning Department that denied the removal of nine (9) Canary Island Pine Trees from the property located at 575 E. Remington Drive, Sunnyvale, CA. (APN’s: 211-20-041, 211-20-060, and 211-20-062). The required filing fee of $284.00 ($142.00 per tree removal permit) was paid December 21, 2010, by check, # 4582, copy attached.

In support of this appeal, attached, please find the following:

1. Additional photos of the subject nine trees, Trees # 1, 3, 4, 5, 6, 7, 8, 9, and 17 that provide more views of these trees and their high or severe potential hazards to the property, buildings, and the public; and

2. The nine (9) tree reports by the certified arborist, Carlos Corona, # WB-8243A (that were attached to the original tree removal applications) that read, “It is highly likely that the subject tree will fail in the near future [or it] will create significant structure damage, posing a significant hazard to the existing property and the public.”

Based on this information, it is irrational and irresponsible to “wait and see” if something will happen. It will happen; it is just a matter of time before the trees fail and/or cause damage to structures and/or the public.

Although pruning and thinning out trees was and can be helpful, it is not a good, long-term solution because:

1. The trees are too close to the buildings;
2. Pruning and thinning out trees was already performed (early 2008) and the same hazards still remain; and
3. It is only a temporary (but unreliable solution) of protecting property and people.

For these aforesaid reasons, I submitted this letter to request an appeal of the decision that denied the removal of nine (9) Canary Island Pine Trees.

Sincerely,

Steve Pavlina
