Name (Optional) _____

Comments: Currently parking space occupies ~41% of the land use. Would it be better if we can build a multi-story parking structure so that more parking space can be converted to build additional buildings (larger library, other Sunnyvale city offices, etc.)?

- lots of green, established green space
- great the way it is
- openness of space is positive
- teen center
- library expansion
- landscape is great, take advantage of what's there
- expansion of core functions
- Community Garden is great
- Public Safety relocated to make room for park
- playgrounds, picnic tags
- the existing green space is well liked

ESU 1

- parking area could be reduced? or consolidated with less
- keep the land!
- keep the trees!
- expand library toward Office Center
- passive spaces are great
- maker/outdoor connections

ESU 2

- open green space aesthetically important spiritually
- bizz in open statement that "open space must usable"
- landscape could be reduced by utilizing integrated parking
- keep green spaces
- kids park
- need more park space
- indoor/outdoor spaces for library
- maintain Community Garden
- currently not used on weekends
- more centralized to site (Community Center)
- or, relocated to Community Center

ESV 3

- not a feeling of overcrowding
- gathering site somewhere in City, if not at C.C.
- not necessarily a need for a children's function
- Not MANHATTAN!
- more visible connections
- library plaza is one of the better parts of the site
- keep footprint 2 or 3 (use existing buildings) 3rd character of buildings/site
- key decision - determine future branch library
- more open space, specifically around building

ESUS

- Separation between City and Community uses on site
- maintain open space and buildings
- no higher than 3 stories
- keep C.G. as is
- is below grade parking an option?
- accommodate functions primarily over bringing more people
- electrical at open space
- more connection to downtown

ESU 6

- like that there's plenty of parking
- like the buildings are set back from street
- keep library area quiet (no playground adjacent)
- move non-essential functions off the site
- no tree removal
- too much parking
- the City NEEDS the existing green space
- public art, plazas,
- more walking paths
- plenty of parking already
- more dense buildings to increase open space
- places to sit, contemplate, read, eat lunch
- set back multi-story portions of buildings to maintain one story feel
- exercise stations
- protect Community Garden

- maintain flexible space for future needs
- keep statue @ library

ESU 7

- maintain/create places for users to interact w/ outdoor spaces
- City should be purchasing land, not selling — for parks, etc.
- small scale services
- spaces that can accommodate larger events, but not permanently designed for it
- brick is walkable
- connect outdoor spaces
- walking paths
- look into closing off alleys
- bike lockers, bike paths
- alternate transportation options

ESU 8

- more park / friendly activities
  - convert some land into city park
  - pavilion for events
  - visible community functions promote civic
- LEED platinum city hall at
  - new library - not renovated
- more identity
- more density to allow more open space
- gathering places

ESV 9

Comments: The library should not be moved to the Community center site.

It needs to be about where it is - close to Downtown, bus service, walking distance to nearby residential areas with lots of children. For example, there is a large concentration of families with small children in the area around [redacted] Washington Park + areas to West & South. + my 5 year old grand daughter has walked here for several years
