Evaluation and Decision-Making Criteria

- Draft criteria for preliminary designs include:
  - Maintain current / acceptable vehicle peak hour level of service (LOS) at key intersections
  - Lane widths for motorized vehicles & bicycles
  - Ability to provide continuous Class II bicycle lanes
  - Traffic calming & pedestrian safety attributes
  - Potential for speed and collision reduction
  - Cost considerations – modification of roadway elements including curbs, medians, pavement, landscaping
  - Parking supply impacts

Please give your feedback on your top-priority evaluation criteria

Draft Climate Action Plan (CAP) policies

Chair Walz requested adding this item to the BPAC meeting agenda as a discussion item. A study session of City Council, BPAC and the Planning Commission is scheduled for Tuesday, October 26th. The study session will take place from 5:45 to 6:45 p.m. in the Library Program Room.

During the study session, staff will provide a brief presentation on the work that has been carried out to date on the CAP with the majority of time dedicated to discussion. A preliminary set of draft CAP policies has been prepared based on input of the Horizon 2035 Committee, public members and staff. This set of draft policies is currently under revisions and will be mailed out to all Council, BPAC and Planning Commission members prior to the study session. In the meantime for reviewing draft CAP policies shared with the public during the September 29th outreach meeting and other relevant information, please visit:
