NASA/JPL SOLAR SYSTEM AMBASSADOR TO SPEAK AT SUNNYVALE PUBLIC LIBRARY

SUNNYVALE, Calif. – Have you ever wanted to stargaze from your own backyard? Despite the light pollution, there are still stellar objects we can see from Sunnyvale. Come to a free multimedia program from NASA/JPL Solar System Ambassador Eric B. Norris, on Wednesday, October 20, at 7 p.m. and learn what objects you can see best in the night sky, as well as what type of telescope might be right for you.

As part of the presentation, Norris will also give updates on current and future NASA missions in our solar system. Librarian Sara Kempen says, “Eric’s talk is just the kind of science program that our high tech community appreciates.”

The Library is located at 665 West Olive Ave., across from City Hall. Free parking is always available, and VTA line 54 serves the Library. More information on Library programs and activities is available on the Library’s Web site at www.sunnyvalelibrary.org, or by calling the Library at (408) 730-7300, TDD (408) 730-7501.
