MATHILDA AVENUE TO EXPERIENCE TRAFFIC DELAYS

Expect manual traffic control to slow traffic

SUNNYVALE, Calif. – Sunnyvale Department of Public Safety officers will direct traffic on Mathilda and California avenues most of the day Thursday, May 3. The traffic signals at that intersection are being replaced with new signals as part of the Mathilda Bridge upgrade project. Motorists should expect periodic lane closures that may further slow traffic while work is conducted between 9 a.m. and 4 p.m.

Mathilda Avenue is a major north-south artery through Sunnyvale, connecting Moffett Park, U.S. 101, downtown, the Caltrain Station with southern Sunnyvale, I-280 and the City of Cupertino.
