THEATRE SHOWCASES INNOVATIVE LED THEATRICAL LIGHTING

Sunnyvale's venue among first in nation to adopt new lighting technology

SUNNYVALE, Calif. – Sunnyvale Theatre will host a free public demonstration of its new energy efficient theatrical lighting system on Wednesday, Jan. 22, 6:30-7 p.m.

The 200-seat venue, owned and operated by the City of Sunnyvale, is one of the first theatres in the country to install an all-LED (light emitting diode) system. City staff and theatrical lighting experts will explain how the new technology works, highlight its cost-benefits to the City and put the technology through its paces with a full-blown light show demonstrating its application in different types of performances.

Immediately following the presentation, guests will be invited onstage to view the lighting instruments up close and try the iPad controller. Santa Clara-based Musson Theatrical, the equipment installer, also will host a reception in the Theatre lobby.

Although the event is free to the public, space is limited. RSVP to tmclane@sunnyvale.ca.gov or 408-730-7725. Sunnyvale Theatre is located at the Sunnyvale Community Center, 550 E. Remington Drive.
