SECTION 8.10. TRANSPORTATION DEMAND MANAGEMENT (cont'd)
(SMC Ch. 10.60)

Non-compliance Penalty Calculation Detail:

- Compliance determination will be based on maximum allowable AM and PM peak hour trips as identified in the conditions of approval
- Both AM and PM peak hour trips will be surveyed; the penalty is based on the highest deficiency of the two
- Reduction factors:
 - o Level 0: project is compliant, penalties are not applicable
 - o Level 1: Achieve a 0%-9.9% reduction - Pay full penalty (\$3,000 per trip in excess of maximum allowable trips)
 - o Level 2: Achieve a 10%-19.9% reduction - Pay 75 % penalty (\$2,250 per trip in excess of maximum allowable trips)
 - o Level 3: Achieve 20%-29.9% reduction - Pay 50% penalty (\$1,500 per trip in excess of maximum allowable trips)
 - o Level 4: Achieve 30% or more - Pay 25% of penalty (\$750 per trip in excess of maximum allowable trips)

*The fees and penalties will be adjusted annually based on the Consumer Price Index (CPI) with the adoption of the City-wide fee schedule each fiscal year.

SECTION 9.02 WATER AND SEWER CONNECTION FEES

Pursuant to Section 66001 of the Government Code, the City Council hereby determines:

- (1) The purpose of the water and sewer connection charges is to assure payment by developers of their pro rata share of the escalated cost of the City's water and sanitary sewer system.
- (2) The charge will be used to reimburse the City for the owner or developer's fair share of the use of the water system and sanitary sewer systems.
- (3) There is a reasonable relationship between the use of the fees, the need for a water system, a wastewater treatment plant, and the types of development projects upon which the fee is imposed. All development projects create varying needs for the consumption of water which cannot be fulfilled unless the project is connected to the municipal water system to assure an adequate supply of water to each project. Plus, each project creates a need for sewage conveyance, disposal and treatment. The degree to which each project is charged is based upon factors related to the degree of potential usage, such as: type and size of projects, number of units, and calculations of the escalated cost of the City's sanitary sewer system; the current system capacity; the cost of conveyance, treatment and disposal per equivalent single-family dwelling unit; and the estimated daily discharge for each facility to be connected to the sanitary sewer system, taking into account proportionate average daily discharge of sewage, total organic carbon, sewage, suspended solids, and ammonia nitrogen. The fees or charges shall be collected from the owner or developer of property either (1) prior to approval of the original connection of the property to the water or sanitary sewer system, or a redevelopment with incremental impact, or (2) in the event the uses being made of the property presently connected to the system are enlarged, added to, or further structures are constructed on the property.

A. Water Connection Fees.

The following definitions shall be used for the purpose of determining the connection fee in this section:

- (a) A residential "unit" shall mean one or more rooms used for living purposes by one family.
- (b) A commercial, industrial, or institutional "unit" shall mean each one hundred (100) gallons of expected daily water demand commercial, industrial, or institutional purposes.
- (c) "Institutional property" shall mean property used only for the erection and maintenance of church, school, hospital, or public buildings.
- (d) A hotel "unit" shall mean a room in a hotel that is intended or designed for dwelling, lodging or sleeping purposes by transient occupants. Units in a hotel that contain facilities for cooking and washing dishes shall be classified as low occupancy residential units.

The connection fee to be paid for each parcel or property served through the same water lateral by the owner or developer of residential, commercial, industrial, or industrial property shall be computed as follows:

<u>Residential Units</u>					
Standard Occupancy Unit (with 3 or more bedrooms)	<u>\$6,753.00</u>	6043	00001	432351	Water Connection Fees
Low Occupancy Unit (with 1 or 2 bedrooms, 2 bedrooms and den)	<u>\$3,826.00</u>	6043	00001	432351	Water Connection Fees

SECTION 9.04 FIRE HYDRANTS

The following definitions shall apply to this section:

- (1) Hydrant service area shall be defined as the area that a hydrant will serve the normal fire protection needs as determined by the City, taking into account the street pattern, type of development, size of water service mains, and all other factors bearing on plans for fire prevention and suppression.
- (2) Frontage shall be defined as (a) that side of the lot on which the water service is installed to serve the lot for one-family or two-family residential corner lots, (b) the frontage measured along all public rights-of-way of the parcel being developed or improved for commercial, institutional, industrial, or multiple family property.
- (3) Development or "Improvement" shall be deemed to occur when a Building Permit, Development Permit or Subdivision Agreement is required, except when the additional floor space is less than one additional residential unit or less than 1,000 square feet of additional gross floor area. In the case of developments other than residential, "development" or "improvement" shall also be deemed to occur whenever a parcel of property is redeveloped under a different zoning classification.

Section 1.02 - Water Within City Limits

Water sold to consumers within the corporate limits of the City of Sunnyvale shall be sold at the rates specified. All users shall pay a water charge for each one-hundred cubic feet (equal to 748 gallons), or part thereof, of water as follows. In residential developments where two (2) or more dwelling units are served by a common meter, the upper limit (in cubic feet) of each rate block shall be multiplied by the dwelling units served by the common meter in calculating the rates to be applied to water usage monitored by the common meter. In such case, the lower limit of each rate block shall be one (1) cubic foot over the upper limit of the next lower rate block.
